MEAT ANIMALS-FARM PRODUCTION, DISPOSITION AND INCOME, BY STATES, 1953 AND 1954

Farm production of meat animals in 1954 totaled 46.8 billion pounds, 5 percent more than the 44.5 billion pounds produced in 1953, according to the Crop Reporting Board. This is the highest production on record, exceeding the previous record of 46.6 billion pounds produced in 1943. Production of cattle and calves in 1954 was the highest of record. Sheep and lambs and hog production were also higher than in 1953. Cattle and calf production amounted to 56 percent of the total farm production of meat animals in 1954, with hogs furnishing 41 percent and the remaining 3 percent coming from sheep and lambs. In 1953, cattle and calves represented 58 percent of the total; hogs, 39 percent; and sheep and lambs, 3 percent.

Gross income (cash receipts plus value of home consumption) from meat animals amounted to 9.5 billion dollars in 1954, 3 percent more than the 9.2 billion dollar income in 1953. Gross income in 1954 for each species, cattle and calves, hogs, and sheep and lambs was larger than in 1953. The increase in gross income for hogs was due to both larger marketings and higher prices, while for cattle and calves and sheep and lambs the increase was due to larger marketings, since prices per 100 pounds were lower. Cash receipts for farm marketings totaled 9.1 billion dollars, exceeding the 8.8 billion received in 1953 by 3 percent.

Cattle and Calves: The estimated production of cattle and calves in 1954 was 26.2 billion pounds, the highest of record. This compares with 25.6 billion pounds produced in the preceding year. The increase in production was the result of a record high calf crop. Gross income from cattle and calves at 5.2 billion dollars was 4 percent larger than the 5.0 billion dollar income in 1953. Cash receipts of 5.1 billion dollars were 219 million or 4 percent larger than 1953. The average price per hundred pounds live weight received by producers in 1954 was $16.00 for cattle and $16.50 for calves. This was 30 cents per hundred pounds less than in 1953 for both cattle and calves.

Hogs: The production of hogs in 1954 totaled 19.1 billion pounds, 9 percent above the 17.5 billion pounds produced in 1953, but 25 percent below the record production of 25.4 billion pounds produced in 1943. Gross income from hogs in 1954 amounted to 4.0 billion dollars, 1 percent more than the 3.9 billion dollars in 1953. This compares with the record of 4.5 billion in 1947. Cash receipts totaled 3.7 billion dollars, about 52 million dollars more than in 1953. In 1954, the average price per 100 pounds was $21.60 compared with $21.40 in 1953 and the record of $24.10 in 1947.

Sheep and lambs: Production of sheep and lambs in 1954 amounted to 1.5 billion pounds compared with 1.4 billion in 1953. The record production was 2.3 billion pounds produced in 1942. Gross income from sheep and lambs was 327 million dollars compared with 317 million in 1953 and the record of 468 million in 1951. Cash receipts of 324 million dollars were 3 percent larger than the preceding year. In 1954, sheep sold for an average of $6.10 per hundred pounds live weight and lambs at $19.20. In 1953, the selling price of sheep was $6.66 and lambs $19.30.

1/Balance sheet estimates. Total of marketings, farm slaughter, deaths and on hand end of year equals total of calf crop, inshipments, and on hand beginning of year.

2/Not strictly a calving rate. Figure represents calves born expressed as percentage of the January 1 inventory of cows and heifers 2 years old and over on January 1 and not the number of all cows and heifers giving birth to calves during the year.

3/Excludes interfarm sales.

1/Balance sheet estimates. Total of marketings, farm slaughter, deaths and on hand end of year equals total of calf crop, inshipments, and on hand beginning of year.

2/Not strictly a calving rate. Figure represents calves born expressed as percentage of the January 1 inventory of cows and heifers 2 years old and over on January 1 and not the number of all cows and heifers giving birth to calves during the year.

3/Excludes interfarm sales.
